

PEELING ENZYMATIC - PEEL-OFF GELS MASK WITH PAPAIN AND BROMELAIN FRUIT ENZYMES

Cosmetic first grade

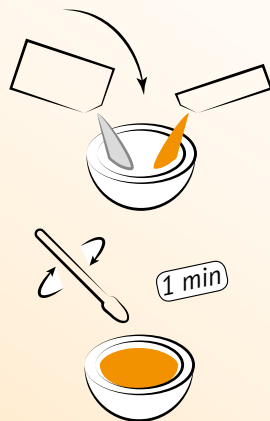

PROPERTIES: Activates and normalizes the skin desquamation, and removes the dead cells of the epidermis.

The bromelain and papain are enzymes of vegetal origin (pineapple and papaya), mainly used to accelerate the desquamation, by doing a superficial peeling of the superior layer of the epidermis.

INSTRUCTIONS

- Pour the sachet of alginate «neutral base» and the stick of «actives» into a bowl.
- Mix the 2 gels for about 1 min using a spatula.

- Apply the Peeling Enzymatic Peel-off Gels Mask on the skin, in an even layer, using a spatula or a brush.
- Leave the Peeling Mask to jellify for 5 min.
- Remove it in one piece, like a second skin!

INCI NAME

AQUA • CALCIUM SULFATE • ALGIN • PHENOXYETHANOL • TETRASODIUM PYROPHOSPHATE • CYAMOPSIS TETRAGONOLOBA GUM • XANTHAN GUM • BROMELAIN • PAPAIN • ETHYLEXYLGLYCERIN • PARFUM • LIMONENE • CI 19140

Depending on the formula adjustment and the evolution of suppliers data, please note that we have to validate the INCI before you print your films and labels.
